

Nanopowder ZnO

We offer zinc oxide ZnO products in suspension (water, ethylene glycol, isopropanol) or granular powder. Average crystallite size range is 20-40nm. **Doped ZnO is available as well.**

Application: cosmetics, pharmacy, agriculture, electronics

Histogram of the particle size distribution, DLS

Purity better than 95%

Specific surface area BET 10-50 m²/g

Crystal size 20-40nm

True density 5,2g/cm³
